

Why an Accenture internship? Because you want to test yourself in the field and find a direction for your future, participating in projects that will transform our customers' business. Start your career with us, supported by colleagues who will help you grow as a professional.

Stage Capability Network [Online / Phone Recruitment]

Milan, Rome

Your challenges

Our opportunities are dedicated to students or undergraduates who want a curricular (such as a thesis) or extracurricular internship.

An Accenture internship can be the beginning of your technology and innovation career. You will express your talent within a team of professionals, enriching yourself with new skills through training, and interfacing with those who followed this path before you.

- You will take part in international Capability Network projects, using an analytical-quantitative data approach to define and implement strategic solutions for our customers.
- You will learn to analyse and use Big Data to develop new digital processes and improve technological infrastructures.
- You will acquire solid expertise in using management and analytical solutions (Anaplan, Tagetik, SAP Analytics Cloud, Powersim) for effective business planning
- You will turn your strategies into reality, enabling the digital process and technological changes to support the CFO department (**Digital Finance area**).
- You will learn how to use data and analytics to provide high value-added consulting solutions (**Data Driven Consulting area**)
- You will use emerging automation technologies to develop innovative solutions (**Robotic Process Automation area**)
- You will redesign employee experience processes (**Talent and Organisation area**)

Behind a successful project there is a great strategy, at Accenture it is innovation. You'll contribute to the business development by giving space to intuition and creativity.

Join the [Capability Network](#): You will collaborate with highly specialised professionals on international projects in a stimulating and dynamic environment.

The experience lasts three to six months and may end with a direct hiring. We guarantee for you customised training sessions and a monthly refund.

Qualification

Why would we choose you for an Accenture internship? Because you're passionate about new technologies and innovation and have the following abilities:

- You are about to graduate in Management Engineering, Engineering, Mathematics, Physics, Statistics or Economics with a technical or Business Administration focus.
- You are fascinated by the latest technological innovations
- You have a dynamic approach and are interested in dealing with international settings
- You speak English well, and express yourself naturally
- You value uniqueness
- Every day is a new challenge for you and an opportunity to learn something new
